Residential construction: Building permits, housing starts, housing completion (all in '000s):

These are typically covered from around 1990, some from 1985 in some countries, and nearly all from 1999

Note: Data for housing completions are available in all countries. In some countries, only building permits OR housing starts are available, not both.

Non-residential construction, specific subsectors 1):

Note: These series are based on the published EUROCONSTRUCT reports and do not take all changes of definitions and other adjustments into account. This is a design decision: We have preferred to develop a more comprehensive database, rather than limit it to fully comparable data, since most adjustments are small.

For notes, sources, methods etc., please refer to the EUROCONSTRUCT reports.

For recent years and for the forecast, this is covered in the most recent EUROCONSTRUCT report, which should be consulted along with these series
